

A SATELLITE IS ANYTHING THAT ORBITS OR SPINS AROUND A BIGGER OBJECT. THESE OBJECTS CAN BE HUMAN-MADE, LIKE ME, OR NATURAL.

## WHAT IS A SATELLITE?

**TASK 2: WHICH OF THESE DO YOU THINK ARE EXAMPLES OF SATELLITES?**

**FACT:** There are thousands of human-made satellites in orbit around our Earth which have been launched since 1957.

THE MOON

THE SUN

THE EARTH

THE INTERNATIONAL SPACE STATION

A COMMERCIAL PLANE
