

HISTORY OF LAUNCH

TASK 3: CAN YOU MATCH THESE HISTORICAL SPACE DEVELOPMENTS WITH THEIR CORRECT YEAR?

Draw a line between the date and the event

WE CAN DO MANY DIFFERENT THINGS INCLUDING HELPING WITH COMMUNICATIONS, HELPING WITH WEATHER FORECASTING, AND TRACKING THINGS LIKE ILLEGAL FISHING AND CLIMATE CHANGE.

1957

Valentina Tereshkova becomes the first woman in orbit.

1969

Yuri Gagarin becomes the first person to orbit the Earth.

2022

The Hubble Space Telescope is launched.

1990

Satellites and Goonhilly Earth Station help broadcast the moon landing across the world.

1998

The first horizontal launch from Spaceport Cornwall is expected to take place.

1961

The world's first satellite Sputnik 1 is launched.

1963

International Space Station launched.

FACT: Satellites can also take pictures of the Earth, Sun and other planets, and look deep into space at black holes, distant stars and galaxies.
