

# Spaceport Cornwall

Kernow Sat-1 co-creation

**Today's objectives:**

**Today you will be helping Cornwall's very own spaceport with the creation of their brand for Kernow Sat-1.**

**Spaceport Cornwall needs your creative minds to help come up with a logo design that will be launched into space!**

# Explainer video

Play the video to find out more about Spaceport Cornwall and what we'd like you to do.

## Aims:

- You will explore how you can use different shapes to create your own logo.
- You will learn about colour theories and associations.
- You will learn how to mix colours to create your own colour palette.
- As a class you will work together to create a pattern for Kernow Sat-1 using the designs you have made.

# Worksheets 1 - Shapes

## What is a logo?

As a class we will learn the definition of a logo and look at some examples.

## Task 1 - Exploring shapes

Using the worksheets in front of you, cut out all the shapes and experiment with different orientations and placement.

## Task 2 - Creating your logo

Using the worksheet in front of you start designing your logo. Use the examples to help you.

# Worksheets 2 - Colour

## Learning about colour theory and colour association

As a class we will learn about the colour wheel, colour theories and colour associations.

### Task 1 - Colour association

Using what we've learnt, you now need to complete task 1.

### Task 2 - Creating your own colour palette

Using the worksheet in front of you and thinking about everything you've learnt about colour, now create your own colour palette for Kernow Sat-1.

# Worksheets 3 - Collaboration

## Task 1 - Combining your work

Using what you've created from the shape and colour worksheets, you need to combine the two to create your logo design.

## Task 2 - Class pattern

As a class we will now work together to create one pattern for Kernow Sat-1. Look at the worksheet you have been given to help with layout and use of colours.

Thank you for all  
your hard work!
